

STAY AWAY[®] ANTS

HOW IT WORKS: Like all Stay Away[®] products, this blend smells good to us, and not-so good to finicky critters. Stay Away[®] Ants disperses a scent that ants find offensive, so you can eat in peace.

HOW TO USE: Use a pouch anywhere ants might look for food, including pantries and cupboards, or anywhere you want to keep them from entering. Increase number of pouches as needed.

STAY AWAY[®] MOTHS

HOW IT WORKS: Moths use their sense of smell to find the best spots to lay their eggs—unfortunately, that can mean your linens and clothes. Our special blend is guaranteed to keep moths out.

HOW TO USE: Place a pouch anywhere clothes or linens are stored, such as drawers, chests or closets. Increase number of pouches as needed.

STAY AWAY[®] SPIDERS

HOW IT WORKS: Spiders prefer quiet, scent-free spots. Stay Away[®] Spiders disrupts their senses and prevents them from sticking around—along with the insects they like to eat—forcing them to house hunt elsewhere.

HOW TO USE: Place a pouch anywhere you notice webs or spiders, such as basements, closets or attics. Increase number of pouches as needed.

STAY AWAY[®] BOTANICAL RODENT REPELLENT

HOW IT WORKS: Rodents have poor eyesight, but their heightened sense of smell makes up for it. Stay Away[®] Rodent prevents them from nesting or congregating in spaces they would otherwise find appealing.

HOW TO USE: Use in non-living areas such as attics, pantries, basements and garages, or enclosed spaces such as vehicles.

STAY AWAY[®] BEETLES

HOW IT WORKS: Beetles and bugs may seek warm entrances to your home to escape cold or inclement weather. Stay Away[®] Beetles spreads a rosemary scent that sends them back outdoors.

HOW TO USE: Use a pouch around windows, doors or anywhere you want to prevent beetles and bugs from entering. Increase number of pouches as needed.

MADE WITH OILS OF
LEMONGRASS, PEPPERMINT & THYME

STAY AWAY® POUCH POD™

SCENT POUCH HOLDER

Our biodegradable pod helps Stay Away® products last three times longer than they would on their own.

HOW TO USE

STEP 1

Squeeze sides to remove the base.

STEP 2

Remove plastic outer wrap from scent pouch and tuck the pouch snugly into the pod.

STEP 3

Reattach base. Pouch Pod may be hung, placed on a flat surface, or displayed as sustainable art.

Detachable
hanger
included

STAY AWAY® POUCH POD™

Allows for a slow, steady release of the pouches' essential oils

Made from farm-grown flax, beets and sunflower hulls

Reusable for up to three years
