

WINTER CLEANING CHECKLIST

This Winter-Tidying Checklist contains simple tips to help you safeguard your property and equipment.

- Ensure all human & pet food is in airtight, sealed containers. Place a Stay Away Moths pouch in your food-storage area to repel pantry moths.
- Place a natural rodent repellent like Stay Away Rodent in your basement, attic, closet, pantry, or anywhere else rodent or rodent droppings have been noticed.
- When storing holiday decorations for the season, place a Stay Away Spiders pouch in the box to prevent arachnids from moving in.
- If you use rodent traps or poisons, replace them with a rodent repellent like Stay Away Rodent.
- Rodents often nest in snow blowers, lawnmowers, & other electrical tools. Protect your equipment from pests by placing Stay Away Rodent pouches inside or near machinery.
- If you have a vehicle in storage, place a Stay Away Rodent pouch under the hood to keep pests away from electrical wires. Remember to remove the pouch before operating the vehicle.
- EarthKind pest repellent pouches can also keep rodents, spiders, & moths from infesting RV's, trailers, boats, & motorcycles.
- Fill in tiny openings outside or in the corners of your home with steel wool & silicone caulking to keep mice out. Any spaces the size of or larger than a dime should be filled.
- Recycle any newspaper or cardboard boxes from the holidays. Bugs such as silverfish, cockroaches, & termites feast on paper products.
- Vacuum spider webs—look near windows, closets, attics, or crawl spaces—and prevent those 8-legged critters from coming back by placing Stay Away Spiders in those areas.
- Thoroughly clean your barbeque & place a zipper cover on it. Spiders are attracted to the odor of propane so put a Stay Away Spiders pouch inside the cover to prevent these 8-legged critters from nesting in your grill.
- Vacuum your vehicle, wash floor mats, & dispose of anything in your glove compartment or trunk you no longer need. Clutter can attract spiders.
- Prevent rodents from inhabiting vehicles you're currently driving by placing Stay Away Rodent pouches in the glove compartment & trunk.
- Undisturbed garages are especially vulnerable to infestations in the winter. Clean up as much clutter as you can, ensure there are no sources of water or food for pests, & place the necessary EarthKind repellents inside to keep pests away.
